-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2154

Art Rejections:

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claims 1-12 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Baum et al, U.S. pat. Appl. Pub. No. 2003/0211839.

Per claims 1 and 8, Baum discloses a real-time communications system comprising:

a) an inter-architecture network (Internet) utilizing a single IP protocol (see par. 58-59);

Art Unit: 2154

b) a plurality of border elements (516, 518, fig. 5), each of said border elements in communication with said inter-architecture network and each of said border elements in communication with an external network (501, 503, fig. 5) (see par. 60-61); and

c) a plurality of call control elements (536), each of said call control elements in communication with said inter-architecture network (see par. 62-66).

Per claim 2, it is noted that the Internet comprises many media servers (e.g., web sites) (see par. 20).

Per claims 3 and 9, Baum teaches utilizing many essential network elements including DHCP server and core routers (see par. 60).

Per claims 4-5, Baum teaches employing E911 server for providing assistance to law enforcement personnel (see par. 67).

Per claims 6-7, Baum also teaches employing other application servers and network resource servers (532, 534, 537) to provide call control/routing functions (see par. 65).

Per claims 10-12, it is noted that Baum's system would accommodate any conventional external networks utilizing any known protocols (see par. 58).

Conclusion:

Art Unit: 2154
